

# Smart Link Manager - Project Notes (Day 2)

## Project Goal

Build an AI-powered Smart Link Manager with URL shortening and Gemini summaries.

## Completed Features

- React frontend setup
- URL input and Generate button
- Loading and error states
- Express backend
- POST /summary endpoint
- Frontend-backend communication
- Dynamic short URL generation
- Dynamic tags
- Gemini API integration
- Git and GitHub setup

## Architecture

User → React → Fetch → Express → Gemini → Express → React UI

## Pending Work

Database storage, search, deployment, analytics.
